Indian Institute of Science,
Bengaluru

“Not Too Old to Be President”
-Bernie Sanders
Dear Colleagues and Friends,

Key to the success of any country's health services is the skill base within the health sector. There is a worldwide shortage of qualified physicians and nurses, and these sought-after professionals are increasingly leaving their native lands to pursue better career opportunities abroad. Countries that have acknowledged the shortfall in medical personnel and the attendant health challenges and implications might find it useful to identify their current and anticipated human resource needs within the health sector and to collaborate with the education and training sectors to ensure that sufficient numbers of qualified health professionals are available to meet domestic demand. Planners must identify strategies for attracting and retaining doctors and nurses. It is essential that the changing age profile of a country be taken into account when evaluating the potential for producing sufficient numbers of clinicians and other professionals to meet evolving health service needs.

In many countries, geriatrics and care approaches for older persons are not well developed. Clinical staffs often lack specific knowledge of age-related health issues and the expertise necessary for optimal service provision. A number of universities and training institutions have introduced geriatrics and gerontology into their medical and academic programmes, but much remains to be done to build the essential foundations for effective elder care.

Dear Colleagues and Friends,

The V World Congress on Gerontology and Geriatrics, Healthy Ageing In the Changing World - 2019 is the premier educational event in geriatrics, providing the latest information on clinical care, research on aging, and innovative models of care delivery. The Conference will address the educational needs of geriatrics professionals from all disciplines. Physicians, nurses, pharmacists, physician assistants, social workers, long-term care and managed care providers, health care administrators, and others can update their knowledge and skills through state-of-the-art educational sessions and research presentations.

The conference offers many continuing education sessions, including invited symposia, workshops, and meet-the-expert sessions. Sessions will include information about emerging clinical issues, current research in geriatrics, education, health policy, and delivery of geriatric health care.

Meeting attendees will have many wonderful opportunities to network and exchange ideas and information with colleagues. The Presidential Poster Reception, Special Interest Group Meetings, Section Meetings for Fellows-in-Training, Nurses, Pharmacists, Social Workers, and Teachers are all great opportunities to interact with colleagues.
BioGenesis Health Cluster (Not For Profit) are at an immense pleasure and pride in cordially inviting all interested and energetic participants/members all over the world to our Welcome to V World Congress on Gerontology & Geriatrics -2019 to be held on 21st and 22nd November, 2019 at J. N. Tata Auditorium, Indian Institute of Science, Bangalore, India whose key motive is “Advancing the Elderly Care Practices for Promoting Healthy Aging”.

The International Congress, which is held every year, is an opportunity for many well-known gerontologists, geriatrics scholars, policy decision-makers, professional activists, related companies, and researchers to get together and share recent discoveries and study results.

BioGenesis Health Cluster has been working rigorously towards the health and wellbeing of the elderly population since 2012. The proceedings and outcomes of the conference were submitted to various Government bodies such as Ministry of Health, Govt. of India, ICMR (Indian Council of Medical Research) as well as to many national and international research organizations and NGO’s working on Geriatrics which helped them in identifying grey areas of the field and also in accelerating their research in the field of Geriatrics and Gerontology.

BioGenesis Health Cluster in collaboration with the Indo-British Geriatrics Council (IBGC) is pleased to announce the “V World Congress on Geriatrics & Gerontology-International Conference on Healthy Ageing in Changing World, scheduled on 21st & 22nd of November 2019 at J.N.TATA Auditorium, Indian Institute of Science, Bengaluru, Karnataka, India.

It also provides the premier interdisciplinary and multidisciplinary forum for researchers, practitioners and educators to present and discuss the most recent innovations, trends, and concerns, practical challenges encountered and the solutions adopted in the field of Geriatrics & Gerontology. The scientific program will feature live workshops, interactive education sessions, B2B meetings, round-table discussions apart from the conventional plenary sessions, featured symposia, breakout sessions and oral presentation sessions for abstracts and challenging cases.

FOCUS ON THE CONFERENCE:

- Recognize the inevitability of population ageing and the need to adequately prepare all stakeholders (governments, civil society, private sector, communities, and families) for the growing numbers of older persons.
- Ensure that all older persons can live with dignity and security, enjoying access to essential health and social services and a minimum income through the implementation of national social protection floors and other social investments.
- Support communities and families to develop support systems which ensure that frail older persons receive the long-term care they need and promote active and healthy ageing.
- Developing comparative research on ageing, and ensure that gender and culture-sensitive data and evidence from this research are available to inform policymaking.
- Overwhelming burden of disease in older persons such as non-communicable diseases (NCDs), Ischemic heart disease, stroke and chronic lung diseases which are the biggest killers. Visual and hearing impairment, dementia and osteoarthritis which are the main causes of disability.
AIMS OF THE CONFERENCE:

Our aim through this conference is to raise awareness about the speed of population ageing and, more generally, about the experience of being old in our changing world. Abuse, neglect and violence against older persons are much more prevalent than currently acknowledged, and points the way towards more effective prevention strategies and stronger legislation that can protect their human rights.

- Access to Quality Health care
- Income Security
- Enabling Environments
- Social Status of the Elderly

BENEFITS OF ATTENDING:

- Exchange ideas and network with leading geriatricians, gerontologists, healthcare providers, geriatric nurses and researchers from more than 40 countries
- Discuss quality initiatives that can be applied in the practice
- Discuss ways to collaborate in putting quality initiatives in place throughout the geriatrics and gerontology research
- Participants can gain direct access to a core audience of professionals and decision makers and can increase visibility through branding and networking at the conference
- Learn and discuss key news and challenges with senior level speakers.
